

# Adjustable Rate Mortgage Application

# Uniform Residential Loan Application

This application is designed to be completed by the applicant(s) with the Lender's assistance. Applicants should complete this form as "Borrower" or "Co-Borrower," as applicable. Co-Borrower information must also be provided (and the appropriate box checked) when  the income or assets of a person other than the Borrower (including the Borrower's spouse) will be used as a basis for loan qualification or  the income or assets of the Borrower's spouse or other person who has community property rights pursuant to state law will not be used as a basis for loan qualification, but his or her liabilities must be considered because the spouse or other person has community property rights pursuant to applicable law and Borrower resides in a community property state, the security property is located in a community property state, or the Borrower is relying on other property located in a community property state as a basis for repayment of the loan.

If this is an application for joint credit, Borrower and Co-Borrower each agree that we intend to apply for joint credit (sign below):

Borrower \_\_\_\_\_ Co-Borrower \_\_\_\_\_

**X. INFORMATION FOR GOVERNMENT MONITORING PURPOSES**

The following information is requested by the Federal Government for certain types of loans related to a dwelling in order to monitor the lender's compliance with equal credit opportunity, fair housing and home mortgage disclosure laws. You are not required to furnish this information, but are encouraged to do so. The law provides that a lender may not discriminate either on the basis of this information, or on whether you choose to furnish it. If you furnish the information, please provide both ethnicity and race. For race, you may check more than one designation. If you do not furnish ethnicity, race, or sex, under Federal regulations, this lender is required to note the information on the basis of visual observation and surname if you have made this application in person. If you do not wish to furnish the information, please check the box below. (Lender must review the above material to assure that the disclosures satisfy all requirements to which the lender is subject under applicable state law for the particular type of loan applied for.)

# ***INVESTORS BANK***

## **FIRST MORTGAGE LOAN** Adjustable Rate Mortgage (ARM)

Important Information About the Adjustable Mortgage Loan

### ***Please Read Carefully***

This loan may differ from other loans with which you are familiar. Please read this disclosure document. This document describes the features of the adjustable rate mortgage program you are considering.

#### **1. INITIAL INTEREST RATE:**

The initial interest rate on the loan is established at the time you submit a completed application. This rate is based upon market conditions. You should ask about the current discount amount, current margin value and current interest rate.

If you do not use the property described in the mortgage as your primary residence, the interest rate may be increased as detailed in the "certificate of residency."

#### **2. MONTHLY PAYMENTS:**

Your initial monthly payment will be based on the loan amount, interest rate and number of years to repay (term).

Monthly payments are usually determined by use of financial payment tables. Interest is calculated on a 360-day basis and is divided into a monthly amount based on the unpaid principal balance due at the end of each month.

#### **3. KEY TERMS OF OUR ADJUSTABLE RATE MORTGAGE PROGRAMS:**

Following is a summary of the basic terms of our Adjustable Rate Mortgages. This summary is intended for reference purposes only. Important information relating specifically to your loan shall be contained in the loan agreement.

##### **a. The common terms are as follows:**

LOAN TERM:	Twenty (20), twenty-five (25) or thirty (30) years.
SECURITY:	First lien on property.
RATE CHANGE INDEX:	The index to be used will be the weekly average yield on United States Treasury securities adjusted to a constant maturity of one year as made available by the Federal Reserve Board.

**b. Specific terms are as follows:**

Frequency of Rate Changes:

<b>Product</b>	<b>Fixed-Rate Period</b>	<b>Interest Rate Adjustment</b>
Three-year ARM	first 36 months	every 12 months thereafter
Five-year ARM	first 60 months	every 12 months thereafter
Seven-year ARM	first 84 months	every 12 months thereafter
Ten-year ARM	first 120 months	every 12 months thereafter

Adjustments shall be rounded to the nearest one-eighth of one percent (.125%) for both increases and decreases. No increase during the entire loan term shall result in an interest rate change of more than five percent (5%) per annum over the initial interest rate, nor shall the rate be increased or decreased more than two percent (2%) per annum during any 12 month period.

Frequency of Payment Changes – The monthly principal and interest payments shall be fixed as noted above under “Fixed-Rate Period” and adjust every 12 months thereafter.

**HOW YOUR ADJUSTABLE MORTGAGE LOAN WOULD WORK**

The initial interest rate on your ARM shall be established at the time of your application, based on market conditions.

Adjustments to your interest rate shall be equal to the published index rate plus two and three-fourths percent (2.75%), rounded to the nearest one-eighth of one percent (.125%).

**4. NOTICE OF PAYMENT ADJUSTMENTS:**

You will be sent a notice of an adjustment to the payment amount at least twenty-five (25) but not more than forty-five (45) days before it becomes effective. This notice shall contain the following information.

1. The date on which your mortgage payment will be adjusted.
2. The outstanding loan balance as of the date of payment adjustment.
3. The interest rate at time of adjustment and the index on which the rate is based. In addition, the basis for future rate and payment adjustments.
4. The payment amount as of the adjustment date.
5. A list of rate adjustments since the last payment adjustment and the respective index values.
6. A schedule listing all adjustments to the loan balance since the last payment adjustment.

You will be provided with the name of a person to contact should you have any questions regarding this notice.

**5. CONTRACTUAL OBLIGATIONS:**

There are certain obligations on your part which, if not kept, will result in a default of the mortgage. This means that the entire loan could be due and payable in full or may result in a forced sale of your home.

**A default will occur if:**

1. You fail to pay the monthly payment within thirty (30) days of its due date.
2. You fail to maintain insurance on the property for the benefit of the lender, including, but not limited to, hazard insurance with extended coverage and flood insurance, if required.
3. You change or transfer ownership (title) of the property as described in the mortgage document.
4. You fail to pay any real estate tax, assessments, water or sewer rents or other governmental charges or impositions levied against the property when due.
5. You fail to maintain the mortgaged property in reasonably good repair whereby the original value of the property, as used for collateral on this loan, would be reduced.
6. You fail to comply with all requirements of law with respect to the mortgage property.

**6. LATE CHARGES:**

A late charge of five percent (5%) of any monthly payment not received within fifteen (15) days of the payment due date can be added to the amount due for the particular monthly payment of principal and interest.

**7. PREPAYMENT:**

This loan may be prepaid in part or in full at any time without penalty.

**8. ESCROW ACCOUNT:**

An escrow account for payment of taxes is provided for in the loan contract. The purpose of requiring the escrow payment is to enable the timely payment of taxes and protection of our lien. Also included in the escrow account may be funds for various insurance coverages such as hazard and/or flood insurance and/or private mortgage insurance. The monthly escrow payment will be established as being one-twelfth of the annual property taxes plus any annual insurance premiums and a one-month cushion as outlined in the loan contract.

The borrower will receive an annual analysis of the escrow account. Should there be a deficiency, it will be spread over the next twelve months as part of the escrow payment. The borrower may, if he desires, pay the deficiency in a single payment at the time of notification. Any surplus in excess of \$50 will automatically be refunded within 30 days of the issuance of the escrow analysis.

Failure to make escrow payments as required constitutes a default in the same manner as failure to make an interest and principal payment.

**9. TERMS:**

The lender and the applicant become bound by the terms of the loan contract when it is signed. The mortgage and note establish the rights of the borrower and lender. You should review these documents with your closing attorney.

**10. EXAMPLE OF MAXIMUM RATES AND PAYMENTS:**

**a. Three-Year Adjustable Rate Mortgage**

On a \$10,000 loan with an initial interest rate of 3.50% in effect June, 2011, the maximum amount the interest rate can rise under this program is 5 percentage points to 8.50%, and the payment can rise as follows, depending on the term of the loan, beginning with year 4:

	<b>20-Year Term</b>	<b>25-Year Term</b>	<b>30-Year Term</b>
<b>Initial Payment</b>	\$58.00	\$50.06	\$44.90
<b>Maximum Payment:</b>	\$81.66	\$76.40	\$73.50

To see what your monthly payment would have been during that period, divide your mortgage amount by \$10,000, then multiply the monthly payment by that amount. For example, the monthly payment for a mortgage amount of \$60,000 would be:

20-year term	25-year term	30-year term
$\$60,000/\$10,000 = 6$	$\$60,000/\$10,000 = 6$	$\$60,000/\$10,000 = 6$
$6 \times \$58.00 = \$348.00$	$6 \times \$50.06 = \$300.36$	$6 \times \$44.90 = \$269.40$

**b. Five-Year Adjustable Rate Mortgage**

On a \$10,000 loan with an initial interest rate of 3.50% in effect June, 2011, the maximum amount the interest rate can rise under this program is 5 percentage points to 8.50%, and the payment can rise as follows, depending on the term of the loan, beginning with year 6:

	<b>20-Year Term</b>	<b>25-Year Term</b>	<b>30-Year Term</b>
<b>Initial Payment</b>	\$58.00	\$50.06	\$44.90
<b>Maximum Payment:</b>	\$78.83	\$74.07	\$71.56

To see what your monthly payment would have been during that period, divide your mortgage amount by \$10,000, then multiply the monthly payment by that amount. For example, the monthly payment for a mortgage amount of \$60,000 would be:

20-year term	25-year term	30-year term
$\$60,000/\$10,000 = 6$	$\$60,000/\$10,000 = 6$	$\$60,000/\$10,000 = 6$
$6 \times \$58.00 = \$348.00$	$6 \times \$50.06 = \$300.36$	$6 \times \$44.90 = \$269.40$

**c. Seven-Year Adjustable Rate Mortgage**

On a \$10,000 loan with an initial interest rate of 3.875% in effect June, 2011, the maximum amount the interest rate can rise under this program is 5 percentage points to 8.875%, and the payment can rise as follows, depending on the term of the loan, beginning with year 8:

	<b>20-Year Term</b>	<b>25-Year Term</b>	<b>30-Year Term</b>
<b>Initial Payment</b>	\$59.94	\$52.10	\$47.02
<b>Maximum Payment:</b>	\$78.33	\$74.28	\$72.32

To see what your monthly payment would have been during that period, divide your mortgage amount by \$10,000, then multiply the monthly payment by that amount. For example, the monthly payment for a mortgage amount of \$60,000 would be:

20-year term $\$60,000/\$10,000 = 6$ $6 \times \$59.94 = \$359.64$	25-year term $\$60,000/\$10,000 = 6$ $6 \times \$52.10 = \$312.60$	30-year term $\$60,000/\$10,000 = 6$ $6 \times \$47.02 = \$282.12$
--	--	--

**d. Ten-Year Adjustable Rate Mortgage**

On a \$10,000 loan with an initial interest rate of 4.375% in effect June, 2011, the maximum amount the interest rate can rise under this program is 5 percentage points to 9.375%, and the payment can rise as follows, depending on the term of the loan, beginning with year 11:

	<b>20-Year Term</b>	<b>25-Year Term</b>	<b>30-Year Term</b>
<b>Initial Payment</b>	\$62.59	\$54.88	\$49.93
<b>Maximum Payment:</b>	\$77.03	\$74.05	\$72.94

To see what your monthly payment would have been during that period, divide your mortgage amount by \$10,000, then multiply the monthly payment by that amount. For example, the monthly payment for a mortgage amount of \$60,000 would be:

20-year term $\$60,000/\$10,000 = 6$ $6 \times \$62.59 = \$375.54$	25-year term $\$60,000/\$10,000 = 6$ $6 \times \$54.88 = \$329.28$	30-year term $\$60,000/\$10,000 = 6$ $6 \times \$49.93 = \$299.58$

Borrower    Date consumer handbook and disclosure received

CERTIFICATE OF RESIDENCY

I/We, \_\_\_\_\_ hereby certify that the purpose of this application is to obtain mortgage financing for the property identified below:

Property Address: \_\_\_\_\_ (the "Property").

During the term of the mortgage loan, I/we intend to use the Property in the following manner: (Check one)

- (1) \_\_\_\_\_ This condominium unit/one-family dwelling will be used as my/our primary residence and will remain owner-occupied.
(2) \_\_\_\_\_ A part of this multi-family dwelling will be used as my/our primary residence and will remain owner-occupied.
(3) \_\_\_\_\_ This condominium unit/one- or two-family dwelling will be used as my/our second home or vacation home.
(4) \_\_\_\_\_ Other: (Please explain.)

While I/we understand that the Note and Mortgage will more fully set forth, among other things, the interest rate, margin, and interest rate caps, I/we understand that the following italicized provision will be in the Note and Mortgage:

OWNER OCCUPANCY. Any provision of the Note or Mortgage to the contrary notwithstanding, the following provision shall be applicable. If during the term of the loan, Lender discovers that the Property is not being used by Borrower as either a primary or secondary residence, but rather for rental or investment purposes, then:

- (a) if the Note is an Adjustable Rate Note, Lender will have the option of immediately increasing the interest rate by one percent (1%), increasing the "margin" one percent (1%), and increasing the annual and lifetime interest rate caps by one percent (1%); or
(b) if the Note is a Fixed Rate Note, Lender will have the option of immediately increasing the interest rate by one percent (1%); and
(c) failure to pay interest at the increased interest rate will be a default under the Note and Mortgage.

Please assure the completeness of this Certificate of Residency by (i) filling in the Property address above (ii) checking off the intended use of the Property, and (iii) signing and dating this Certificate of Residency below.

Applicant's Signature: \_\_\_\_\_ Date: \_\_\_\_\_
Co-Applicant's Signature: \_\_\_\_\_ Date: \_\_\_\_\_

# INVESTORS HOME MORTGAGE

## A Subsidiary of Investors Bank

249 MILLBURN AVE. MILLBURN, NJ 07041

### Application Processing Disclosure

(Please sign and return)

Thank you for applying to us for a mortgage loan. The purpose of this disclosure is to provide you with:

1. an explanation of certain criteria which must be met in order for the mortgage loan process to be completed.
2. a realistic estimate of the number of days we require to make a loan decision based on normal circumstances.
3. the name or title of the person to whom to direct questions or comments. All information is further explained in the following paragraphs.

#### Fees

The following fees are payable with your application:

1. An Application Fee of \$195.
2. A Credit Report Fee\* of \$40 \*\*
3. A Flood Certification Fee of \$16.

\*\*Deduct \$3 if applying as an individual applicant;

The following fees are payable at closing:

1. An Appraisal fee of from \$300 to \$800. The average cost is \$300 but could be higher depending on the property.
2. A commitment fee of \$250 for Conventional Loans, \$300 for FHA Loans.

\* Credit Report supplements - if supplements or updates are necessary or requested by applicant.

#### When Fees May Be Refunded

All fees listed above are non-refundable, except in the following instances:

1. If we failed to issue a commitment, or a justifiable credit denial, and our estimate of time needed to do so has expired without your substantial fault, and you have withdrawn your loan application as a result, we will refund all fees paid by you; or
2. If, for reasons, which we knew or should have known at the time of application based upon the data you provided, we either deny you application or we issue a commitment on terms substantially different from that requested and you find those terms unacceptable, we will refund all fees paid by you.

#### Loan Decision Time Frame

We estimate that the number of calendar days necessary to make a decision for the program for which you have applied is 30 days following the receipt of you *completed application* the following address:

INVESTORS HOME  
249 MILLBURN AVE.  
MILLBURN, NJ 07041

During the processing of your loan, if we become aware of circumstances which require further review or documentation, we reserve the right to modify our estimate of days required to make a loan decision.

#### What Constitutes a Completed Application

1. Application Fee, Credit Report Fee and Flood Certification Fee
2. Loan Application form signed by all applicants
3. Signed Servicing Disclosure Statement
4. Adjustable Rate Mortgage Information Disclosure, *when applicable*, (5-page form)
5. Signed Borrower's Signature and Authorization Form
6. Copy of a fully executed purchase contract with any addendum
7. Signed copy of this disclosure by all applicants
8. Signed Certificates of Residency
9. Any other documentation that may be deemed necessary to complete the application process.

#### Right to Choose Attorney

You have a right to choose your own attorney to represent you. The lender's attorney only represents the interest of the lender. The interests of the lender and borrower may differ and could conflict. You should employ an attorney of your choice who is licensed to practice law in the state of NEW JERSEY and who will represent your interests.

## Application Processing Disclosure (cont.)

### Appraisal

You have the right to a copy of the appraisal report used in connection with your application for credit. It is ISB Mortgage Co., LLC's policy to provide you with a copy of your appraisal report promptly upon completion/receipt, but no later than 3 business days prior to closing. If your loan does not close and you have not received a copy of your appraisal report, please write to us at the mailing address listed on this form. Unless you have already paid for the appraisal, a fee may be charged. We must hear from you no later than 90 days after we notify you about the action taken on your credit application or you withdraw your application.

### Choice of Insurance Notice

You have a right to select insurance of your choice. We shall not require that you, upon financing the purchase of real property or lending money on the security of real property, as a condition precedent, concurrent or subsequent to financing the purchase of such property or renewal or extension to lending money upon the security of a mortgage thereon, negotiate a policy of insurance or renewal thereof through a particular insurer, agent, solicitor or broker. If we do not accept the insurance chosen by you, we will provide you with an explanation.

### Important Information About Procedures For Opening A New Account

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

What this means for you: When you open an account, we will ask for your name, address, date of birth, and other information that will allow us to identify you. We may also ask to see your driver's license or other identifying documents.

### Questions/Comments

Should you have comments, question or complaints, you may direct written inquires to Russell J. Tucker, Senior Vice President at the address listed above.

### Borrower Obligations

1. By signing this document, you agree that you or your agents will provide requested information and/or documentation within the required time frame and in the manner we specify; and provide accurate and complete information which corresponds with all other information and/or documentation supplied by you or your agents.
2. In the event you loan is approved and a commitment is issued, you or your agents must produce on or before the date we specify all documentation requested in the commitment or closing instruction and be ready, willing and able to close you loan on or before the date we specify.
3. If you or your agents do not meet these obligation and, as a result, your loan is not approved or does not close, we will not refund to you and of the fees you have paid.

### Acknowledgement

This Application Processing Disclosure is intended to supplement other federal disclosures you will receive such as the Good Faith Estimate of Closing Costs, HUD Settlement Cost Booklet, Truth-In-Lending Disclosure and, if applicable, ARM disclosure. These other disclosures describe certain material aspects of your loan. Please review these documents carefully.

In addition, this constitutes neither an approval of your loan nor a commitment by us to make you a loan. By signing below, you acknowledge that you have received a copy of this Application Processing Disclosure.

## NOTICE TO THE HOME LOAN APPLICANT

In connection with your application for a home loan, the lender must disclose to you the score that a consumer reporting agency distributed to users and the lender used in connection with your home loan and the key factors affecting your credit scores.

The credit score is a computer-generated summary calculated at the time of the request and based on information that a consumer reporting agency has on file. The scores are based on data about your credit history and payment patterns. Credit scores are important because they are used to determine what interest rate you may be offered on the mortgage. Credit scores can change over time, depending on your conduct, how your credit history and payment patterns change, and how credit scoring technologies change.

Because the score is based on information in your credit history, it is very important that you review the credit-related information that is being furnished to make sure it is accurate. Credit records may vary from one company to another.

If you have questions about your credit score or the credit information that is furnished to you, contact the consumer reporting agency at the address and telephone number provided with this notice, or contact the lender if the lender developed or generated the credit score. The consumer reporting agency plays no part in the decision to take any action on the loan application and is unable to provide you with specific reasons for the decision on a loan application.

This information will be provided to you once the lender has requested and received credit information from the consumer reporting agencies. If you have questions concerning the terms of the loan, contact the lender.

National Community Reinvestment Coalition

National Consumer Law Center

National Credit Union Administration

This handbook gives you an overview of ARMs, explains how ARMs work, and discusses some of the issues that you might face as a borrower. It

includes:

- ways to reduce the risks associated with ARMs;
- pointers about advertising and other sources of information, such as lenders and other trusted advisers;
- a glossary of important ARM terms; and
- a worksheet that can help you ask the right questions and figure out whether an ARM is right for you. (Ask lenders to help you fill out the worksheet so you can get the information you need to compare mortgages.)

An adjustable-rate mortgage (ARM) is a loan with an interest rate that changes. ARMs may start with lower monthly payments than fixed-rate mortgages, but keep in mind the following:

- Your monthly payments could change. They could go up—sometimes by a lot—even if interest rates don't go up. See page 20.
- Your payments may not go down much, or at all—even if interest rates go down. See page 11.
- You could end up owing more money than you borrowed—even if you make all your payments on time. See page 22.
- If you want to pay off your ARM early to avoid higher payments, you might pay a penalty. See page 24.

You need to compare the features of ARMs to find the one that best fits your needs. The Mortgage Shopping Worksheet on page 2 can help you get started.

# Mortgage shopping worksheet

Ask your lender or broker to help you fill out this worksheet.

Name of lender or broker and contact information
Mortgage amount
Loan term (e.g., 15 years, 30 years)
Loan description (e.g., fixed rate, 3/1 ARM, payment-option ARM, interest-only ARM)
<b>Basic Features for Comparison</b>
Fixed-rate mortgage interest rate and annual percentage rate (APR) (For graduated-payment or stepped-rate mortgages, use the ARM columns.)
<b>ARM initial interest rate and APR</b> How long does the initial rate apply?
What will the interest rate be after the initial period?
<b>ARM features</b> How often can the interest rate adjust?
What is the index and what is the current rate? (See chart on page 8.)
What is the margin for this loan?
<b>Interest-rate caps</b> What is the periodic interest-rate cap?
What is the lifetime interest-rate cap? How high could the rate go?
How low could the interest rate go on this loan?
What is the payment cap?
Can this loan have negative amortization (that is, increase in size)?
What is the limit to how much the balance can grow before the loan will be recalculated?
Is there a prepayment penalty if I pay off this mortgage early?
How long does that penalty last? How much is it?
Is there a balloon payment on this mortgage? If so, what is the estimated amount and when would it be due?
What are the estimated origination fees and charges for this loan?
<b>Monthly Payment Amounts</b>
What will the monthly payments be for the first year of the loan?
Does this include taxes and insurance? Condo or homeowner's association fees? If not, what are the estimates for these amounts?
What will my monthly payment be after 12 months if the index rate...
...stays the same?
...goes up 2%?
...goes down 2%?
What is the <b>most</b> my minimum monthly payment could be after 1 year?
What is the <b>most</b> my minimum monthly payment could be after 3 years?
What is the <b>most</b> my minimum monthly payment could be after 5 years?

# What is an ARM?

An adjustable-rate mortgage differs from a fixed-rate mortgage in many ways. Most importantly, with a fixed-rate mortgage, the interest rate stays the same during the life of the loan. With an ARM, the interest rate changes periodically, usually in relation to an index, and payments may go up or down accordingly.

To compare two ARMs, or to compare an ARM with a fixed-rate mortgage, you need to know about indexes, margins, discounts, caps on rates and payments, negative amortization, payment options, and recasting (recalculating) your loan. You need to consider the maximum amount your monthly payment could increase. Most importantly, you need to know what might happen to your monthly mortgage payment in relation to your future ability to afford higher payments.

Lenders generally charge lower initial interest rates for ARMs than for fixed-rate mortgages. At first, this makes the ARM easier on your pocketbook than would be a fixed-rate mortgage for the same loan amount. Moreover, your ARM could be less expensive over a long period than a fixed-rate mortgage—for example, if interest rates remain steady or move lower.

Against these advantages, you have to weigh the risk that an increase in interest rates would lead to higher monthly payments in the future. It's a trade-off—you get a lower initial rate with an ARM in exchange for assuming more risk over the long run. Here are some questions you need to consider:

- Is my income enough—or likely to rise enough—to cover higher mortgage payments if interest rates go up?
- Will I be taking on other sizable debts, such as a loan for a car or school tuition, in the near future?
- How long do I plan to own this home? (If you plan to sell soon, rising interest rates may not pose the problem they do if you plan to own the house for a long time.)
- Do I plan to make any additional payments or pay the loan off early?

### **Lenders and Brokers**

**Mortgage loans are offered by many kinds of lenders—such as banks, mortgage companies, and credit unions. You can also get a loan through a mortgage broker. Brokers “arrange” loans; in other words, they find a lender for you. Brokers generally take your application and contact several lenders, but keep in mind that brokers are not required to find the best deal for you unless they have contracted with you to act as your agent.**

# How ARMs work: the basic features

## Initial rate and payment

The initial rate and payment amount on an ARM will remain in effect for a limited period—ranging from just 1 month to 5 years or more. For some ARMs, the initial rate and payment can vary greatly from the rates and payments later in the loan term. Even if interest rates are stable, your rates and payments could change a lot. If lenders or brokers quote the initial rate and payment on a loan, ask them for the annual percentage rate (APR). If the APR is significantly higher than the initial rate, then it is likely that your rate and payments will be a lot higher when the loan adjusts, even if general interest rates remain the same.

## The adjustment period

With most ARMs, the interest rate and monthly payment change every month, quarter, year, 3 years, or 5 years. The period between rate changes is called the *adjustment period*. For example, a loan with an adjustment period of 1 year is called a 1-year ARM, and the interest rate and payment can change once every year; a loan with a 3-year adjustment period is called a 3-year ARM.

## Loan Descriptions

**Lenders must give you written information on each type of ARM loan you are interested in. The information must include the terms and conditions for each loan, including information about the index and margin, how your rate will be calculated, how often your rate can change, limits on changes (or caps), an example of how high your monthly payment might go, and other ARM features such as negative amortization.**

## The index

The interest rate on an ARM is made up of two parts: the index and the margin. The index is a measure of interest rates generally, and the margin is an extra amount that the lender adds. Your payments will be affected by any caps, or limits, on how high or low your rate can go. If the index rate moves up, so does your interest rate in most circumstances, and you will probably have to make higher monthly payments. On the other hand, if the index rate goes down, your monthly payment could go down. Not all ARMs adjust downward, however—be sure to read the information for the loan you are considering.

Lenders base ARM rates on a variety of indexes. Among the most common indexes are the rates on 1-year constant-maturity Treasury (CMT) securities, the Cost of Funds Index (COFI), and the London Interbank Offered Rate (LIBOR). A few lenders use their own cost of funds as an index, rather than using other indexes. You should ask what index will be used, how it has fluctuated,

tuated in the past, and where it is published—you can find a lot of this information in major newspapers and on the Internet.

To help you get an idea of how to compare different indexes, the following chart shows a few common indexes over an 11-year period (1996–2008). As you can see, some index rates tend to be higher than others, and some change more often. But if a lender bases interest-rate adjustments on the average value of an index over time, your interest rate would not change as dramatically.

## The margin

To set the interest rate on an ARM, lenders add a few percentage points to the index rate, called the *margin*. The amount of the margin may differ from one lender to another, but it is usually

constant over the life of the loan. The *fully indexed rate* is equal to the margin plus the index. If the initial rate on the loan is less than the fully indexed rate, it is called a *discounted index rate*. For example, if the lender uses an index that currently is 4% and adds a 3% margin, the fully indexed rate would be

Index	4%
+ Margin	3%
Fully indexed rate	7%

If the index on this loan rose to 5%, the fully indexed rate would be 8% (5% + 3%). If the index fell to 2%, the fully indexed rate would be 5% (2% + 3%).

Some lenders base the amount of the margin on your credit record—the better your credit, the lower the margin they add—and the lower the interest you will have to pay on your mortgage. In comparing ARMs, look at both the index and margin for each program.

### **No-Doc/Low-Doc Loans**

**When you apply for a loan, lenders usually require documents to prove that your income is high enough to repay the loan. For example, a lender might ask to see copies of your most recent pay stubs, income tax filings, and bank account statements. In a “no-doc” or “low-doc” loan, the lender doesn’t require you to bring proof of your income, but you will usually have to pay a higher interest rate or extra fees to get the loan. Lenders generally charge more for no-doc/low-doc loans.**

## Interest-rate caps

An interest-rate cap places a limit on the amount your interest rate can increase. Interest caps come in two versions:

- *A periodic adjustment cap*, which limits the amount the interest rate can adjust up or down from one adjustment period to the next after the first adjustment, and
- *A lifetime cap*, which limits the interest-rate increase over the life of the loan. By law, virtually all ARMs must have a lifetime cap.

### Periodic adjustment caps

Let's suppose you have an ARM with a periodic adjustment interest-rate cap of 2%. However, at the first adjustment, the index rate has risen 3%. The following example shows what happens.

#### **Examples in This Handbook**

**All examples in this handbook are based on a \$200,000 loan amount and a 30-year term. Payment amounts in the examples do not include taxes, insurance, condominium or homeowner association fees, or similar items. These amounts can be a significant part of your monthly payment.**

Difference in 2nd year between payment with cap and payment without = \$138.70 per month

In this example, because of the cap on your loan, your monthly payment in year 2 is \$138.70 per month lower than it would be without the cap, saving you \$1,664.40 over the year.

Some ARMs allow a larger rate change at the first adjustment and then apply a periodic adjustment cap to all future adjustments.

A drop in interest rates does not always lead to a drop in your monthly payments. With some ARMs that have interest-rate caps, the cap may hold your rate and payment below what it would have been if the change in the index rate had been fully applied. The increase in the interest that was not imposed because of the rate cap might carry over to future rate adjustments. This is called *carryover*. So, at the next adjustment date, your payment might increase even though the index rate has stayed the same or declined.

The following example shows how carryovers work. Suppose the index on your ARM increased 3% during the first year.

Because this ARM limits rate increases to 2% at any one time, the rate is adjusted by only 2%, to 8% for the second year. However, the remaining 1% increase in the index carries over to the next time the lender can adjust rates. So, when the lender adjusts the interest rate for the third year, even if there has been no change in the index during the second year, the rate still increases by 1%, to 9%.

In general, the rate on your loan can go up at any scheduled adjustment date when the lender’s standard ARM rate (the index plus the margin) is higher than the rate you are paying before that adjustment.

### Lifetime caps

The next example shows how a lifetime rate cap would affect your loan. Let’s say that your ARM starts out with a 6% rate and the loan has a 6% lifetime cap—that is, the rate can never exceed 12%. Suppose the index rate increases 1% in each of the next 9 years. With a 6% overall cap, your payment would never exceed \$1,998.84—compared with the \$2,409.11 that it would have reached in the tenth year without a cap.

## Payment caps

In addition to interest-rate caps, many ARMs—including payment-option ARMs (discussed on page 16)—limit, or cap, the amount your monthly payment may increase at the time of each adjustment. For example, if your loan has a payment cap of 7½%, your monthly payment won’t increase more than 7½% over your previous payment, even if interest rates rise more. For example, if your monthly payment in year 1 of your mortgage was \$1,000, it could only go up to \$1,075 in year 2 (7½% of \$1,000 is an additional \$75). Any interest you don’t pay because of the payment cap will be added to the balance of your loan. A payment cap can limit the increase to your monthly payments but also can add to the amount you owe on the loan. (This is called *negative amortization*, a term explained on page 22.)

Let’s assume that your rate changes in the first year by 2 percentage points, but your payments can increase no more than 7½% in any 1 year. The following graph shows what your monthly payments would look like.

While your monthly payment will be only \$1,289.03 for the

Difference in monthly payment = \$172.69

second year, the difference of \$172.69 each month will be added to the balance of your loan and will lead to negative amortization.

Some ARMs with payment caps do not have periodic interest-rate caps. In addition, as explained below, most payment-option ARMs have a built-in recalculation period, usually every 5 years. At that point, your payment will be recalculated (lenders use the term *recast*) based on the remaining term of the loan. If you have a 30-year loan and you are at the end of year 5, your payment will be recalculated for the remaining 25 years. The payment cap does not apply to this adjustment. If your loan balance has increased, or if interest rates have risen faster than your payments, your payments could go up a lot.

# Types of ARMs

## Hybrid ARMs

Hybrid ARMs often are advertised as 3/1 or 5/1 ARMs—you might also see ads for 7/1 or 10/1 ARMs. These loans are a mix—or a hybrid—of a fixed-rate period and an adjustable-rate period. The interest rate is fixed for the first few years of these loans—for example, for 5 years in a 5/1 ARM. After that, the rate may adjust annually (the 1 in the 5/1 example), until the loan is paid off. In the case of 3/1 or 5/1 ARMs:

- the first number tells you how long the fixed interest-rate period will be, and
- the second number tells you how often the rate will adjust after the initial period.

You may also see ads for 2/28 or 3/27 ARMs—the first number tells you how many years the fixed interest-rate period will be, and the second number tells you the number of years the rates on the loan will be adjustable. Some 2/28 and 3/27 mortgages adjust every 6 months, not annually.

## Interest-only (I-O) ARMs

An interest-only (I-O) ARM payment plan allows you to *pay only the interest* for a specified number of years, typically for 3 to 10 years. This allows you to have smaller monthly payments for a period. After that, your monthly payment will increase—even if interest rates stay the same—because you must start paying back the principal as well as the interest each month.

For some I-O loans, the interest rate adjusts during the I-O period as well.

For example, if you take out a 30-year mortgage loan with a 5-year I-O payment period, you can pay only interest for 5 years and then you must pay both the principal and interest over the next 25 years. Because you begin to pay back the principal, your payments increase after year 5, even if the rate stays the same. Keep in mind that the longer the I-O period, the higher your monthly payments will be after the I-O period ends.

## Payment-option ARMs

A payment-option ARM is an adjustable-rate mortgage that allows you to choose among several payment options each month. The options typically include the following:

- *a traditional payment of principal and interest, which reduces the amount you owe on your mortgage. These payments are based on a set loan term, such as a 15-, 30-, or 40-year payment schedule.*

- *an interest-only payment*, which pays the interest but does not reduce the amount you owe on your mortgage as you make your payments.
- *a minimum (or limited) payment* that may be less than the amount of interest due that month and may not reduce the amount you owe on your mortgage. If you choose this option, the amount of any interest you do not pay will be added to the principal of the loan, **increasing the amount you owe and your future monthly payments**, and increasing the amount of interest you will pay over the life of the loan. In addition, if you pay only the minimum payment in the last few years of the loan, you may owe a larger payment at the end of the loan term, called a *balloon payment*.

The interest rate on a payment-option ARM is typically very low for the first few months (for example, 2% for the first 1 to 3 months). After that, the interest rate usually rises to a rate closer to that of other mortgage loans. Your payments during the first year are based on the initial low rate, meaning that if you only make the minimum payment each month, it will not reduce the amount you owe and it may not cover the interest due. The unpaid interest is added to the amount you owe on the mortgage, and your loan balance increases. This is called *negative amortization*. This means that even after making many payments, you could owe more than you did at the beginning of the loan. Also, as interest rates go up, your payments are likely to go up.

Payment-option ARMs have a built-in recalculation period, usually every 5 years. At this point, your payment will be recalculated (or “recast”) based on the remaining term of the loan. If you have a 30-year loan and you are at the end of year 5, your payment will be recalculated for the remaining 25 years. If your

loan balance has increased because you have made only minimum payments, or if interest rates have risen faster than your payments, your payments will increase each time your loan is recast. At each recast, your new minimum payment will be a fully amortizing payment and any payment cap will not apply. This means that your monthly payment can increase a lot at each recast.

Lenders may recalculate your loan payments before the recast period if the amount of principal you owe grows beyond a set limit, say 110% or 125% of your original mortgage amount. For example, suppose you made only minimum payments on your \$200,000 mortgage and had any unpaid interest added to your balance. If the balance grew to \$250,000 (125% of \$200,000), your lender would recalculate your payments so that you would pay off the loan over the remaining term. It is likely that your payments would go up substantially.

More information on interest-only and payment-option ARMs is available in a Federal Reserve Board brochure, *Interest-Only Mortgage Payments and Payment-Option ARMs—Are They for You?* (available online at [www.federalreserve.gov/consumerinfo/mortgages.htm](http://www.federalreserve.gov/consumerinfo/mortgages.htm)).

# Consumer cautions

## Discounted interest rates

Many lenders offer more than one type of ARM. Some lenders offer an ARM with an initial rate that is lower than their fully indexed ARM rate (that is, lower than the sum of the index plus the margin). Such rates—called discounted rates, start rates, or teaser rates—are often combined with large initial loan fees, sometimes called *points*, and with higher rates after the initial discounted rate expires.

Your lender or broker may offer you a choice of loans that may include “discount points” or a “discount fee.” You may choose to pay these points or fees in return for a lower interest rate. But keep in mind that the lower interest rate may only last until the first adjustment.

If a lender offers you a loan with a discount rate, don’t assume that means that the loan is a good one for you. You should carefully consider whether you will be able to afford higher payments in later years when the discount expires and the rate is adjusted.

Here is an example of how a discounted initial rate might work. Let’s assume that the lender’s fully indexed 1-year ARM rate (index rate plus margin) is currently 6%; the monthly payment for the first year would be \$1,199.10. But your lender is offering an ARM with a discounted initial rate of 4% for the first year. With the 4% rate, your first-year’s monthly payment would be \$954.83.

With a discounted ARM, your initial payment will probably remain at \$954.83 for only a limited time—and any savings during the discount period may be offset by higher payments over the remaining life of the mortgage. If you are considering a discount ARM, be sure to compare future payments with those for a fully indexed ARM. In fact, if you buy a home or refinance using a deeply discounted initial rate, you run the risk of payment shock, negative amortization, or prepayment penalties or conversion fees.

## Payment shock

Payment shock may occur if your mortgage payment rises sharply at a rate adjustment. Let's see what would happen in the second year if the rate on your discounted 4% ARM were to rise to the 6% fully indexed rate.

As the example shows, even if the index rate were to stay the same, your monthly payment would go up from \$954.83 to \$1,192.63 in the second year.

Suppose that the index rate increases 1% in 1 year and the ARM rate rises to 7%. Your payment in the second year would be \$1,320.59.

That’s an increase of \$365.76 in your monthly payment. You can see what might happen if you choose an ARM because of a low initial rate without considering whether you will be able to afford future payments.

If you have an interest-only ARM, payment shock can also occur when the interest-only period ends. Or, if you have a payment-option ARM, payment shock can happen when the loan is recast.

The following example compares several different loans over the first 7 years of their terms; the payments shown are for years 1, 6, and 7 of the mortgage, assuming you make interest-only payments or minimum payments. The main point is that, depending on the terms and conditions of your mortgage and changes in interest rates, ARM payments can change quite a bit over the life of the loan—so while you could save money in the first few years of an ARM, you could also face much higher payments in the future.

## Negative amortization—When you owe more money than you borrowed

Negative amortization means that the amount you owe increases even when you make all your required payments on time. It occurs whenever your monthly mortgage payments are not large enough to pay all of the interest due on your mortgage—meaning the unpaid interest is added to the principal on your mortgage and you will owe more than you originally borrowed. This can happen because you are making only minimum payments on a payment-option mortgage or because your loan has a payment cap.

For example, suppose you have a \$200,000, 30-year payment-option ARM with a 2% rate for the first 3 months and a 6% rate for the remaining 9 months of the year. Your minimum payment for the year is \$739.24, as shown in the previous graph. However, once the 6% rate is applied to your loan balance, you are no longer covering the interest costs. If you continue to make minimum payments on this loan, your loan balance at the end of the first year of your mortgage would be \$201,118—or \$1,118 more than you originally borrowed.

Because payment caps limit only the amount of payment increases, and not interest-rate increases, payments sometimes do not cover all the interest due on your loan. This means that the unpaid interest is automatically added to your debt, and interest may be charged on that amount. You might owe the lender more later in the loan term than you did at the beginning.

A payment cap limits the increase in your monthly payment by deferring some of the interest. Eventually, you would have to

repay the higher remaining loan balance at the interest rate then in effect. When this happens, there may be a substantial increase in your monthly payment.

Some mortgages include a cap on negative amortization. The cap typically limits the total amount you can owe to 110% to 125% of the original loan amount. When you reach that point, the lender will set the monthly payment amounts to fully repay the loan over the remaining term. Your payment cap will not apply, and your payments could be substantially higher. You may limit negative amortization by voluntarily increasing your monthly payment.

Be sure you know whether the ARM you are considering can have negative amortization.

### **Home Prices, Home Equity, and ARMs**

Sometimes home prices rise rapidly, allowing people to quickly build equity in their homes. This can make some people think that even if the rate and payments on their ARM get too high, they can avoid those higher payments by refinancing their loan or, in the worst case, selling their home. It's important to remember that home prices do not always go up quickly—they may increase a little or remain the same, and sometimes they fall. If housing prices fall, your home may not be worth as much as you owe on the mortgage. Also, you may find it difficult to refinance your loan to get a lower monthly payment or rate. Even if home prices stay the same, if your loan lets you make minimum payments (see *payment-option ARMs* on page 16), you may owe your lender more on your mortgage than you could get from selling your home.

## Prepayment penalties and conversion

If you get an ARM, you may decide later that you don't want to risk any increases in the interest rate and payment amount. When you are considering an ARM, ask for information about any extra fees you would have to pay if you pay off the loan early by refinancing or selling your home, and whether you would be able to convert your ARM to a fixed-rate mortgage.

### Prepayment penalties

Some ARMs, including interest-only and payment-option ARMs, may require you to pay special fees or penalties if you refinance or pay off the ARM early (usually within the first 3 to 5 years of the loan). Some loans have *hard prepayment penalties*, meaning that you will pay an extra fee or penalty if you pay off the loan during the penalty period for any reason (because you refinance or sell your home, for example). Other loans have *soft prepayment penalties*, meaning that you will pay an extra fee or penalty only if you refinance the loan, but you will not pay a penalty if you sell your home. Also, some loans may have prepayment penalties even if you make only a partial prepayment.

Prepayment penalties can be several thousand dollars. For example, suppose you have a 3/1 ARM with an initial rate of 6%. At the end of year 2 you decide to refinance and pay off your original loan. At the time of refinancing, your balance is \$194,936. If your loan has a prepayment penalty of 6 months' interest on the remaining balance, you would owe about \$5,850.

Sometimes there is a trade-off between having a prepayment penalty and having lower origination fees or lower interest rates.

The lender may be willing to reduce or eliminate a prepayment penalty based on the amount you pay in loan fees or on the interest rate in the loan contract.

If you have a hybrid ARM—such as a 2/28 or 3/27 ARM—be sure to compare the prepayment penalty period with the ARM’s first adjustment period. For example, if you have a 2/28 ARM that has a rate and payment adjustment after the second year, but the prepayment penalty is in effect for the first 5 years of the loan, it may be costly to refinance when the first adjustment is made.

Most mortgages let you make additional principal payments with your monthly payment. In most cases, this is not considered prepayment, and there usually is no penalty for these extra amounts. Check with your lender to make sure there is no penalty if you think you might want to make this type of additional principal prepayment.

### Conversion fees

Your agreement with the lender may include a clause that lets you convert the ARM to a fixed-rate mortgage at designated times. When you convert, the new rate is generally set using a formula given in your loan documents.

The interest rate or up-front fees may be somewhat higher for a convertible ARM. Also, a convertible ARM may require a fee at the time of conversion.

## Graduated-payment or stepped-rate loans

Some fixed-rate loans start with one rate for 1 or 2 years and then change to another rate for the remaining term of the loan. While

these are not ARMs, your payment will go up according to the terms of your contract. Talk with your lender or broker and read the information provided to you to make sure you understand when and by how much the payment will change.

# Where to get information

## Disclosures from lenders

You should receive information in writing about each ARM program you are interested in before you have paid a nonrefundable fee. It is important that you read this information and ask the lender or broker about anything you don't understand—index rates, margins, caps, and other ARM features such as negative amortization. After you have applied for a loan, you will get more information from the lender about your loan, including the APR, a payment schedule, and whether the loan has a prepayment penalty.

The APR is the cost of your credit as a yearly rate. It takes into account interest, points paid on the loan, any fees paid to the lender for making the loan, and any mortgage insurance premiums you may have to pay. You can compare APRs on similar ARMs (for example, compare APRs on a 5/1 and a 3/1 ARM) to determine which loan will cost you less in the long term, but you should keep in mind that because the interest rate for an ARM can change, APRs on ARMs cannot be compared directly to APRs for fixed-rate mortgages.

You may want to talk with financial advisers, housing counselors, and other trusted advisers. Contact a local housing counseling agency, call the U.S. Department of Housing and Urban Development toll-free at 800-569-4287, or visit [www.hud.gov/offices/hsg/sfh/hcc/hccprof14.cfm](http://www.hud.gov/offices/hsg/sfh/hcc/hccprof14.cfm) to find an agency near you.

Also, see our *Where to go for help* on page A6, for a list of federal agencies that can provide more information and assistance.

## Newspapers and the Internet

When buying a home or refinancing your existing mortgage, remember to shop around. Compare costs and terms, and negotiate for the best deal. Your local newspaper and the Internet are good places to start shopping for a loan. You can usually find information on interest rates and points for several lenders. Since rates and points can change daily, you'll want to check information sources often when shopping for a home loan.

The Mortgage Shopping Worksheet on page 2 may also help you. Take it with you when you speak to each lender or broker, and write down the information you obtain. Don't be afraid to make lenders and brokers compete with each other for your business by letting them know that you are shopping for the best deal.

## Advertisements

Any initial information you receive about mortgages probably will come from advertisements or mail solicitations from builders, real estate brokers, mortgage brokers, and lenders. Although this information can be helpful, keep in mind that these are marketing materials—the ads and mailings are designed to make the mortgage look as attractive as possible. These ads may play up low initial interest rates and monthly payments, without emphasizing that those rates and payments could increase substantially later. So, get all the facts.

Any ad for an ARM that shows an initial interest rate should also show how long the rate is in effect and the APR on the loan. If the APR is much higher than the initial rate, your payments may increase a lot after the introductory period, even if interest rates stay the same.

Choosing a mortgage may be the most important financial decision you will make. You are entitled to have all the information you need to make the right decision. Don't hesitate to ask questions about ARM features when you talk to lenders, mortgage brokers, real estate agents, sellers, and your attorney, and keep asking until you get clear and complete answers.

# Glossary

## Adjustable-rate mortgage (ARM)

A mortgage that does not have a fixed interest rate. The rate changes during the life of the loan based on movements in an index rate, such as the rate for Treasury securities or the Cost of Funds Index. ARMs usually offer a lower initial interest rate than fixed-rate loans. The interest rate fluctuates over the life of the loan based on market conditions, but the loan agreement generally sets maximum and minimum rates. When interest rates increase, generally your loan payments increase; and when interest rates decrease, your monthly payments may decrease.

## Annual percentage rate (APR)

The cost of credit expressed as a yearly rate. For closed-end credit, such as car loans or mortgages, the APR includes the interest rate, points, broker fees, and other credit charges that the borrower is required to pay. An APR, or an equivalent rate, is not used in leasing agreements.

## Balloon payment

A large extra payment that may be charged at the end of a mortgage loan or lease.

## Buydown

When the seller pays an amount to the lender so that the lender can give you a lower rate and lower payments, usually for an initial period in an ARM. The seller may increase the sales price to cover the cost of the buydown. Buydowns can occur in all types of mortgages, not just ARMs.

### Cap, interest rate

A limit on the amount that your interest rate can increase. The two types of interest rate caps are *periodic adjustment caps* and *lifetime caps*. *Periodic adjustment caps* limit the interest-rate increase from one adjustment period to the next. *Lifetime caps* limit the interest-rate increase over the life of the loan. All adjustable-rate mortgages have an overall cap.

### Cap, payment

A limit on the amount that your monthly mortgage payment on a loan may change, usually a percentage of the loan. The limit can be applied each time the payment changes or during the life of the mortgage. Payment caps may lead to negative amortization because they do not limit the amount of interest the lender is earning.

### Conversion clause

A provision in some ARMs that allows you to change the ARM to a fixed-rate loan at some point during the term. Conversion is usually allowed at the end of the first adjustment period. At the time of the conversion, the new fixed rate is generally set at one of the rates then prevailing for fixed-rate mortgages. The conversion feature may be available at extra cost.

### Discounted initial rate (also known as a start rate or teaser rate)

In an ARM with a discounted initial rate, the lender offers you a lower rate and lower payments for part of the mortgage term (usually for 1, 3, or 5 years). After the discount period, the ARM rate will probably go up depending on the index rate. Discounts can occur in all types of mortgages, not just ARMs.

## Equity

In housing markets, equity is the difference between the fair market value of the home and the outstanding balance on your mortgage plus any outstanding home equity loans. In vehicle leasing markets, equity is the positive difference between the trade-in or market value of your vehicle and the loan payoff amount.

## Hybrid ARM

These ARMs are a mix—or a hybrid—of a fixed-rate period and an adjustable-rate period. The interest rate is fixed for the first several years of the loan; after that period, the rate can adjust annually. For example, hybrid ARMs can be advertised as 3/1 or 5/1—the first number tells you how long the fixed interest-rate period will be and the second number tells you how often the rate will adjust after the initial period. For example, a 3/1 loan has a fixed rate for the first 3 years and then the rate adjusts once each year beginning in year 4.

## Index

The economic indicator used to calculate interest-rate adjustments for adjustable-rate mortgages or other adjustable-rate loans. The index rate can increase or decrease at any time. *See also* the chart on page 8, *Selected index rates for ARMs over an 11-year period*, for examples of common indexes that have changed in the past.

## Interest

The rate used to determine the cost of borrowing money, usually stated as a percentage and as an annual rate.

### Interest-only (I-O) ARM

Interest-only ARMs allow you to pay only the interest for a specified number of years, typically between 3 and 10 years. This arrangement allows you to have smaller monthly payments for a prescribed period. After that period, your monthly payment will increase—even if interest rates stay the same—because you must start paying back the principal and the interest each month. For some I-O loans, the interest rate adjusts during the I-O period as well.

### Margin

The number of percentage points the lender adds to the index rate to calculate the interest rate of an adjustable-rate mortgage (ARM) at each adjustment.

### Negative amortization

Occurs when the monthly payments in an adjustable-rate mortgage loan do not cover all the interest owed. The interest that is not paid in the monthly payment is added to the loan balance. This means that even after making many payments, you could owe more than you did at the beginning of the loan. Negative amortization can occur when an ARM has a payment cap that results in monthly payments that are not high enough to cover the interest due or when the minimum payments are set at an amount lower than the amount you owe in interest.

### Payment-option ARM

An ARM that allows the borrower to choose among several payment options each month. The options typically include (1) a traditional amortizing payment of principal and interest, (2) an interest-only payment, or (3) a minimum (or limited) payment that may be less than the amount of interest due that month. If the borrower chooses the minimum-payment option, the amount

of any interest that is not paid will be added to the principal of the loan. *See also* Negative amortization on page A4.

### Points (also called discount points)

One point is equal to 1 percent of the principal amount of a mortgage loan. For example, if the mortgage is \$200,000, one point equals \$2,000. Lenders frequently charge points in both fixed-rate and adjustable-rate mortgages to cover loan origination costs or to provide additional compensation to the lender or broker. These points usually are paid at closing and may be paid by the borrower or the home seller, or may be split between them. In some cases, the money needed to pay points can be borrowed (incorporated in the loan amount), but doing so will increase the loan amount and the total costs. Discount points (also called discount fees) are points that the borrower voluntarily chooses to pay in return for a lower interest rate.

### Prepayment penalty

Extra fees that may be due if you pay off your loan early by refinancing the loan or by selling the home. The penalty is usually limited to the first 3 to 5 years of the loan's term. If your loan includes a prepayment penalty, make sure you understand the cost. Compare the length of the prepayment penalty period with the first adjustment period of the ARM to see if refinancing is cost-effective before the loan first adjusts. Some loans may have a prepayment penalty even if you make a partial prepayment. Ask the lender for a loan without a prepayment penalty and the cost of that loan.

### Principal

The amount of money borrowed or the amount still owed on a loan.

# Where to go for help

For additional information or to file a complaint about a bank, savings and loan, credit union, or other financial institution, contact one of the following federal agencies, depending on the type of institution.

***State-chartered banks that are members of the Federal Reserve System***

Federal Reserve Consumer Help  
PO Box 1200  
Minneapolis, MN 55480  
(888) 851-1920 (toll free)
